

600kW trailer mounted or containerised condensing boiler capable of delivering heating & hot water for emergency or planned maintenance, fast, efficient & easy to install, suitable for a variety of applications.

- Gas fired condensing burner for maximum economy
- Heating & hot water recovery
- Flexible: compatible with pumps, hose, plate packs & air handling units
- Bespoke built at the Cross Rental Services UK facility
- Used in: public sector, construction, facilities management
- Gas can be connected directly to site supply
- Containerised unit housed inside a vandal, sound and thermal-proof 6' steel container. Making this the smallest footprint 600kW boiler available
- Spares & instructions for maintenance
- Can be paired to thermostatically controlled fan coils for flexible delivery of warm air - for events, commercial warehousing & distribution

Detail	General	Heating
Output		591kW
Temperature Range		30-80°C
Fuel Type	Natural Gas	
Fuel Connections	2" Gas Train	
Fuel Consumption	60 m³/hr (Max)	
Power Supply	230v 1ph N+E 50Hz	
Running Current	8 amps	
Plug Type	16A 3 Pin BS4343	
Max Working Pressure		6 Bar
Safety Valves		4.5 Bar
Heat Exchanger		Yes
BMS Outputs	Optional	
Time Clock	Yes	
Frost Protection	No	
Flow	9,800 ltrs/hr @ 45°C	
Pump Capacity		22000 litres/hour @ 1 bar
Variable Temperature Control	Yes	
Height of Flue Above Ground	3890mm	
Expansion Vessel		Primary: 24 litres
NOx	34 mg/kwh	
Flexible Hose Connections	Storz Twist Lock	
Water Connections	Flow/Return	3" Storz
Re-circulation Connection		
Noise Level	45 dBA @ 10 mtrs	
Handling Options	Fork Pockets/4 point lifting eyes	
Weight	1500 kg	
Dimensions (WxDxH in mm)	1950 x 1980 x 1870	
Optional Ancillary Equipment	Boost pump - for longer pipe runs	
	Plate pack - for domestic hot water	
	High temperature flexible hose	
	Manifold sets for multiple boiler connection	
	Air handling units for space heating
